Multi-Way Voting System
ABSTRACT

Description:

In **Voting System** voter can cast his vote in any of the below three ways.

1. Missed Call Voting
2. IVRS Voting
3. Online Voting

Missed Call Voting System:

In **Missed Call Voting System** we assign a unique Toll-Free number for contestants. In this voting process voter can call to one of the Toll-free numbers assigned to contestant to whom the voter is willing to vote. The voter can call only to one toll-free number only once. If he tries for second attempt it will be considered as invalid call. Counting process is done automatically on the basis of number of missed calls.

IVRS Voting System:

In **IVRS Voting System** each constituency will be given a toll-free number. When the voter call the toll-free number voter can listen to the list of contestants. Then voter can select the respective number to whom voter want to vote.

Online Voting:

In Online **Voting** Voter login with his voter Id and password. Then an e-Ballot will be displayed of his constituency now the voter can select any one of the contestant to whom the voter is willing to vote. If the vote is casted successfully an acknowledgment is displayed.

Pros:
- Increment of voting percentage.
- Can be implemented with less budget.
- Saves the time of voter.
- Rigging can be controlled.

Cons:
- Every voter should have a mobile.
